

IT Support | Hosting | Microsoft 365 | Unified Communications

Modern Workplace

CloudHost's Modern Workplace brings the best of Microsoft 365 cloud solutions. Only this time, we've gone one step further to ensure that end-users can work from remote locations without posing a security risk to the sensitive data of your business.

The lead idea behind Modern Workplace is to maintain the flexibility that modern employees crave, but with layers of security that is currently lacking in most remote working setups.

Remote workers want to be able to access files on multiple devices – and sometimes that will mean their personal handsets. The latest-generation of Microsoft 365 tools enables you to securely manage business-owned devices together with employee devices that fall into BYOD (Bring Your Own Device) and CYOD (Choose Your Own Device) style strategies.

Modern Workplace

We proactively look after your whole IT infrastructure with our Remote Monitoring and Management platform built on Barracuda's MSP platform. We're able to monitor your environment 24/7 and resolve critical issues before it even becomes a problem for your staff.

MANAGED IT SUPPORT

Included as part of the package is support of your whole IT infrastructure and your modern workplace. We will solve an IT issue you have.

MICROSOFT 365

Access to all of Microsoft's Cloud Services for Email, File Storage, Collaboration and Unified Communications.

CYBER SECURITY

We will implement and bring your IT infrastructure upto industry standard using best practices as well as our own security policies.
